

VIJAY RAMESH

Software Developer | Frontend Developer (React / Angular) | AI Developer
rvijay1702@gmail.com | +91-9080325548 | linkedin.com/in/vijay-ramesh-914a24235

PROFESSIONAL SUMMARY

Associate Software Engineer with 1+ years of experience in front end engineering, full-stack development, UI/UX design, and AI/ML. Delivered production systems for ASEAN banking clients — RHB Pay (merchant portal), CIMB Group (digital banking UI), HRForz (enterprise HRMS), and a secure bank file format converter. Proficient in Angular 17, React.js, Next.js 16, TypeScript, Python, and Figma. Comfortable working across the full stack in Agile environments.

TECHNICAL SKILLS

Frontend: Angular 17, React.js, Next.js 16, TypeScript, RxJS, Tailwind CSS.

UI/UX: Figma (Design Systems, Prototyping), AI-Assisted Design (Claude, Stitch)

Backend & DB: FastAPI, Node.js, Express.js, PostgreSQL, MySQL, MongoDB, Redis

AI / ML: TensorFlow, Keras, Scikit-learn, Bi-LSTM, CNN, NLP, Pandas, NumPy

WORK EXPERIENCE

Associate Software Engineer | **Finforz Technologies Pvt. Ltd.** | *June 2025 – Present*

▸ Frontend / Full-Stack Developer

- Built RHB Pay Merchant Portal (Angular 17) with standalone architecture, lazy loading, maker-checker workflows, J SON-driven form engine, reusable component library, and i18n support for ASEAN markets.
- Architected HRForz — a full-stack HRMS using Next.js 16, React 19, FastAPI, PostgreSQL, and Redis; delivered a schema-driven form engine, async payroll engine (PF/ESIC/TDS/F&F), RSA-signed JWT auth, fine-grained RBAC, and 85%+ test coverage (Vitest, Playwright, Axe Core).
- Built a 40+ component design system (TypeScript, SCSS Modules, dark mode) with complete Storybook documentation for the HRMS platform.
- Contributed to RinggitPay frontend enhancements using React.js with reusable components and REST API integration.

▸ UI/UX Designer

- Designed end-to-end high-fidelity Figma prototypes for CIMB Group (ASEAN bank, 16+ countries) covering retail and corporate banking flows with full developer-handoff assets.
- Designed RinggitPay SoftPOS Grocery App using AI-assisted tools (Claude, Stitch) for rapid ideation; refined into a complete, prototype-ready Figma design system.
- Built a company-wide Figma component library enabling rapid, consistent multi-screen creation; delivered full app-level UI prototypes for stakeholder validation.

Software Engineer Intern | **Finforz Technologies Pvt. Ltd.** | *January 2025 – May 2025*

▸ AI / ML & Python Developer

- Trained a multi-task deep learning model (Bi-LSTM + CNN) for revenue prediction, payment classification, and anomaly detection on financial datasets using TensorFlow and Keras.
- Engineered Ascertain File Converter (BKR-MBSB) — an ETL desktop app (PyQt5) converting Bank Rakyat payroll files into MBSB Bank's 50-field DTB bulk payment format with IFT/IBG/RENTAS routing, SWIFT code mapping, RSA 2048-bit licensing, dual-tier logging, and packaged as a standalone Windows .exe via PyInstaller.
- Migrated AWS services to on-premise infrastructure using Docker, reducing cloud dependency and improving deployment control.

PROFESSIONAL PROJECTS

RHB Pay — Merchant Portal | *Angular 17, TypeScript, REST APIs, i18n*

- Three-module payment platform (Backoffice, Merchant Portal, Gateway) for RHB Bank — merchant onboarding, maker-checker transactions, dynamic forms, reusable components, and multi-regional i18n.

HRForz — Enterprise HRMS | *Next.js 16, React 19, FastAPI, PostgreSQL, Redis, Storybook, Vitest, Playwright*

- Full-stack HRMS with dynamic form engine, async payroll (PF/ESIC/TDS), 40+ component design system, RSA-signed JWT, RBAC, i18n, and 85%+ automated test coverage.

Ascertain File Converter — BKR to MBSB | *Python, PyQt5, Pandas, Cryptography, PyInstaller*

- Standalone ETL desktop app for interbank file conversion with transaction routing, SWIFT mapping, RSA licensing, and zero-dependency Windows .exe deployment.

CIMB Pay — Digital Banking UI | *Figma, Prototyping*

- End-to-end high-fidelity UI design for CIMB Group (16+ ASEAN countries) — retail and corporate banking flows with full developer-handoff assets.

RinggitPay — SoftPOS Grocery App | *Figma, AI-Assisted Design (Claude, Stitch)*

- AI-augmented Figma design system for a SoftPOS grocery payment app; rapid ideation with Claude/Stitch, refined into a production-ready interactive prototype.

ACADEMIC PROJECTS

- Smart Parking App (React.js, Python, ML, MongoDB): AI-assisted parking slot tracking and booking; ~40% reduction in parking search time.
- IoT Greenhouse System (Raspberry Pi, Python): Real-time soil/pH monitoring with automated irrigation; ~60% reduction in manual intervention.

EDUCATION

M.Tech – Information Technology | CGPA: 8.2

College of Engineering Guindy (CEG), Anna University, Chennai | 2023 – 2025

B.E – Electronics & Communication Engineering | CGPA: 8.45

K. Ramakrishnan College of Engineering (Autonomous), Trichy | 2019 – 2023

CERTIFICATIONS & ACHIEVEMENTS

- TalentNext Java J2EE Certification – Wipro Technologies
- Wipro Digital Skill Readiness Program – Software Development Fundamentals
- Smart India Hackathon 2022 – National Finalist
